DETAILED ACTION

Introduction

1. This action responds to amendment filed on 07-11-2007. Claims 8-9, 13 and 16-18 have been amended and claim 14-15 have been canceled. Claims 1-13 and 16-18 are pending.

Allowable Subject Matter

2. Claims 1-13 and 16-18 are allowed.

3. The following is an examiner's statement of reasons for allowance:

4. Prior art of record such as Digital Production Console DM 2000 Owner's Manual, Yamaha Corporation, June 2002, pp 157-163 (hereafter as Yamaha) teaches a parameter setting device comprising: a plurality of mechanical operators to which a plurality of parameters are respectively allotted, said mechanical operators respectively setting values of the parameters in accordance with respective operation positions; a collective renewal data memory that stores collective renewal data for collectively renewing the values of said plurality of parameters, a collective renewal controlling section for respectively allowing change of the values of said plurality of parameters in accordance with lapse of time to values represented by said collective renewal data upon command of collective renewal, and for respectively allowing movement of the respective operation positions of said plurality of parameters that are changed in accordance with lapse of time (see page 161).

However, none of the prior art teaches that "an invalidation command issuing section for issuing a command of invalidation of said plurality of mechanical operators;

Art Unit: 2615

and an invalidation controlling section for setting the values of said plurality of parameters to the values represented by said collective renewal date and for stopping the movement of said plurality of mechanical operators when the command on invalidation of said plurality of mechanical operators is issued by said invalidation command issuing section during the change of the values of the parameters and the movement of the operation positions of the mechanical operators by said collective renewal controlling section” as recited in independent claim 1.

These limitations, in combination with the remaining limitations of independent claim 1, are not taught nor suggested by the prior art of record.

Independent claims 7 and 16-17 are allowable for similar reason as claim 1.

Dependent claims 2-6 and 8-12 are dependency to independent claims 1 and 7 respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hamamatsu (US PAT. 6,795,560) and Kohyama (US PAT. 6,985,595) are cited to show other related parameter setting device.
